

## PRODUCT INFORMATION

### **Model**

Bio Bull CS Compact Pto

### **Revision**

12-2024

### **Operator/driving force**

Hydraulic drive of conveyor and cloth roll. The machine is equipped with **2** hydraulic pumps operating in separate systems.

Benefits:

- 2 pumps prevent unwanted speed differences when you are entering and cloth rolling.
- Directly driven pumps ensure a compact construction and no maintenance costs.
- Danfoss hydraulic control valves for proper and smooth operation of the machine.

Pto drive of the chopperage. Can be connected left and right. PTO 1.000 RPM

### Outfeed belt

#### Benefits:

- Sustainable outfeed of any product no matter humidity and weight.

### Control panel

Remote control of the machine, system Danfoss.

#### Benefits:

- Operation is always possible from the place with the most visibility and is therefore safe.
- The machine is operated by remote control allowing you to stay out of the danger zone of the machine.
- Danfoss is known worldwide, highly durable and trouble-free.

### Chassis

4 massive wheels

### Dimensions

Machine dimensions approximate:

- Width 2.0 meters.
- Height 2.0 meters.
- Length 2.0 meters.
- Weight +/- 2.500 kg.
- Canvas width up to 1400 mm.
- PTO 1.000 RPM

### Capacity

Up to 5.000 m<sup>2</sup> per hour.

### Optional

- Metal detector.
- Infeed screw recommended with soft fruit.
